PREMIUM GLOSS FINISH by FORMICA GROUP

AR+ is a High Gloss HPL with a superior scuff and mar resistance and therefore usable on vertical and horizontal surfaces. Formica's own laboratory tests show remarkable results. It has also been tested externally by LGA Institute with official certification of AR+ superior performance. Steel wool? Yes, one has to push really hard to get even the smallest scuff on AR+. It is also available in other designs and trendy colours.

AR+ not only performs better in scuff and mar resistance than any gloss HPL product in the market, but it also keeps the gloss level after heavy use. AR+ is a durable high gloss that will make the furniture look newer for longer.

Kerrafront is a modern external cladding. The use of innovative Kerracore technology allowed to combine aesthetic and functional values in the product. The cladding is extremely durable and resistant to changing weather conditions, does not fade or change its shape when exposed to sunlight and temperature. One of the main benefits of using the product is the fact that the Kerrafront does not actually require regular maintenance. It is 100% water resistant and cut edges do not require any additional protection.

VINYLIT

LUXURY

Sheffield Concrete
Oak with Shadow

Turner Malt Oak
with Shadow

Modern & traditional.
Spotlights on! All eyes on the shadow joint.
vinylPlus Shadow

Just like our evergreen vinylPlus profiles, the vinylPlus Shadow profiles are made from 100 % recycled plastic with a UV-resistant textured foil. The high-quality foils impress with their variety of colours. This results in a modern, traditional appearance of a high-contrast, open cladding.

We know that for every human being is the most important house, and each house begins with a door.
They open and close intimate world in which we want to feel happy and safe.
Our passion is to create such a door that will be open with the desire and joy, to overstep the threshold
in the most important place for you in the world - your home.
